# Caravan

Caitlyn Lee, Sean Mceachern, Will Francis, Mona (Xuanpei) Tang, and Talon Knowlton

Project Tracker: (Freedcamp)
https://freedcamp.com/dashboard/home

VCS: Link to your git Repository (for your TA)
https://github.com/willfrancisgit/Caravan-Code/tree/master/Caravan-Code-master
TAs will check to ensure the following are stored in your VCS repository:
- Source Code (throughout the semester)
- Test Cases
- Video demo (optional)
- README.md in GitHub explaining to others what your project is about.
- Project Milestone 7 document titled as Project Milestone7_[TeamNumber].pdf

Contributions:
Deployment:

1. App is deployable on the Heroku Server at
   https://dashboard.heroku.com/apps/caravan-cu/settings
2. This app can be deployed locally in your web broswer: a. download the code
   from the git repository: https://github.com/willfrancisgit/Caravan-Code.git b. using
   the command line, navigate to the Caravan-Code -> Caravan-Code-master c. In
   the server.js make sure that the Heroku server information is commented out and
   uncomment the local hosting code. d. in the command line type "node server.js"
   e. in your web browser address bar type localhost:3000/login to run the hompage
